

Think • Play • Learn

The power of real-world scenarios, the challenge of competitive games,
the promise of performance-based results.

COLLABORATIVE LEARNING SYSTEMS

eGames Generator Software

eGames Generator
allows you to
easily create
your own
custom
learning games

Collaborative Learning System's eGames Generator software allows users to generate high-return, low-cost learning activities for any educational purpose.

With this unique software you can:

- Create your own custom learning games
- Publish your games online in minutes
- Invite participants to compete and assess their knowledge in your own custom eClassroom

With eGames Generator you can build your own custom learning games and publish them online. Specifically designed for learning and reinforcement, eGames allow you to create challenging, motivating learning activities and easily integrate them into your existing training courses or publish them online immediately.

eGames Generator includes the following features:

- Easy, intuitive, authoring interfaces
- An array of different game types
- Detailed Help files, sample games, and demos

- Cross-platform playback using the Flash web player
- No messy software downloads or installations required
- Create eGames from anywhere you have a web connection
- Import your eGames into other authoring tools such as Flash, PowerPoint, Authorware, Breeze, RoboDemo... any application that plays Flash files
- Several skins are included for each eGame format, including a custom skin that allows you to modify the colors
- SCORM compliant
- Full customization for your specific needs for any of the eGame types
- Your own online eClassroom that allows you to group your eGames into custom multi-player arcades. Invite players to compete while playing your eGames!

Give our software a free tryout today! There are no messy downloads or software to install, because it is all web-based. Simply register for a free account, and within minutes you can have your first learning activity ready to distribute. Point your browser to <http://egames.carsonmedia.com>
